WORK EXPERIENCE

Senior Web & Blockchain Developer Box Digital

2023 - Present

Achievements/Tasks

- Created Game Studio function from scratch as product owner and full-stack developer. Built out MVP and five high-stakes casino games, hired and led a nine-member team to take the games studio to millions of players.
- Optimized Web Core Vitals, achieving a 28% signup increase on page speed optimization to a 1,000% improvement on time to load (av. 19sec > 1.9sec on actual user data mobile heavy landing pages with millions of monthly sessions).

Frontend & Web3 Developer Yaku

2021 - 2023

Achievements/Tasks

- Led a frontend team of 4 members and mentored 2 junior developers to help build their skills while working on 3 projects
- Created pixel-perfect and full-responsive UI/UX with React, Tailwind CSS, Material UI and GraphQL
- Wrote smart contracts with Solidity and Vyper and integrated them into frontend with Web3 and Ethers
- Maintained websites up-to-date and added new features according to customers' feedback

Senior Full Stack Software Engineer Viscovery

2018 - 2021

Achievements/Tasks

- Developed affiliate network automation system to collect data, affiliate links, and discount content for over 10,000 brands internationally.
- Built voucher publishing portal site with Express, Node, and React, serving 250k sessions monthly.
- Rebuilt site from Gatsby to Next.js, leveraging SSR and SSG to increase organic traffic by 60%.

Full Stack Engineer Seeds

2016 - 2018

Achievements/Tasks

- Created a mobile responsive UI with CSS flexbox that allowed cross-platform accessibility to the website on any devices.
- Developed Restful APIs and upgraded legacy code structure and UIs with modern frameworks.
- Fixed issues, added new features and updated old version of websites.
- Helped maintain code quality, organization, and automatization.
